Other comments or suggestions:

The literature review draws from extant literature; however, the style of in-text citing is very unusual and does not match any standard citation styles (APA, Harvard, ISO-690, etc.). The author did not fix the formatting and left several blank spaces (e.g., p. 18, 25, 36, 37), disconnected elements of the text (the first paragraph on p. 27), different first-line spacing (e.g., p. 31), problems with logical structuring of the text into sections (e.g., p. 32), and several more issues, which is a sign of poor editing done by the author.

The author elaborated all the steps to address the objectives set in the thesis assignment and provided relevant evidence in the practical part. However, the Gantt chart lacks any explanation, and SWOT items are not tabulated as it is a common practice.

The author presented his work at the Thesis Seminar organized by the Department of Information Technologies on 2 November 2021. I recommend the thesis for the final defense.

Plagiarism control: The system Theses.cz has assessed the thesis as suspicious. After a manual check the file was not assessed as plagiarism.
