**Other comments or suggestions:**

I rate the work as average, the biggest problem of the whole work is the way the author conceived it, meaning graphic processing, errors in text formatting, mixing of chart styles, colours, shapes, grammatical errors and typos. The comprehensibility of the text is sometimes quite bad. Furthermore, the amount of funds should preferably be stated in USD or EUR currency, not in rupees. If stated in rupees, it shall be stated in USD/EUR too for better illustration. This all unnecessarily spoils the overall impression. What is a pity. Otherwise, the work contains a large amount of data processed and it can be seen that the author worked hard. Thus, I rate this Master Thesis as very good.

**Questions for thesis defence:**

Can you tell to which sector of the economy the German foreign direct investments were headed to?

In your opinion – when do you think India becomes developed country, when now is still considered to be a developing country?
