68. I perceive there is an increase in the frequency of drought					
69. I believe diseases can impact the quality of green beans					
70. I feel temperature has increased in recent times					
71. I believe recommended pesticides are relatively expensive					
72. I believe there is decrease in rainfall duration (days)					
73. I believe there is an increase in pest outbreak					

**Annex II**

**Questionnaire for key informants**

The questionnaire typically consists of structured questions which allow respondents to share their thoughts and experiences in detail. The structure is highlighted below. However, insights were not limited to the following:

**Economic Issues**

1. Can you describe briefly the economic challenges faced during the production of green beans
2. How easy is it to acquire loans from formal institutions
3. What are the constraints to land acquisition
4. Are there government incentives to farmers in terms of improved seeds, machinery, subsidized herbicides, fertilizer and pesticides?

### **Social Issues**

1. Kindly describe the model of cooperative or farmer groups (number composition, requirement for entry and election of executives)
2. Do farmers readily assist themselves on their farms or they employ paid labor
3. What is the dynamic of relationship between farmers and European Union
  - a) Do farmers give feedback on challenges or the EU simply expects the standards to be met
  - b) If they do communicate, can you list a few of the channels of dialogue
4. Can you enumerate the steps involved in getting certification

### **Environmental Issues**

1. What are the challenges faced in terms of climate and weather conditions
2. What do you know about Maximum Residue Limit (MRL)
3. Are there money-friendly alternatives to the recommended pesticides stipulated by the European Union?
4. What are the mitigating mechanisms currently employed to the environmental constraints faced by farmers?
