Other comments or suggestions:

Working with this student, I know how far they have come in learning how to evaluate literature and apply statistics. The data interpretation and development of the discussion to connect the results with the literature explored in the theoretical background, could still be improved.

Most unfortunately, this student has not been careful with the sourcing of their information. At least 11 in-text citations have no corresponding source in the bibliography and at least 15 articles listed in the bibliography do not seem to exist when searched. Such carelessness undermines academic integrity, not to mention the scientific process and therefore the thesis work cannot be defended at this time. The student will need to find adequate existing literature to support their claims and to discuss their results before the thesis can be evaluated, as a whole.

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
