Other comments or suggestions:

The chapter methodology is not correctly written. The questionnaire is one of the quantitative methods. Author wrote in his thesis that the qualitative method that is used with questionnaires are open questions – but not in the way author used it. Also author should not use someone else research result to compromise them to his own results, anyway he could compare them.

103 respondents is not big number consider that data were collected from 1st of January to 10th of March by online and offline methods.

Author is completely missing chapter with the main goals!!

I am completely missing Final thesis assignment form as well!!

The chapter literature review is not literature review at all. That chapter is more teoretical basis. You are missing quotations at some paragraphs and the all chapter seems author deleted some paragraphs but in the all the content does not maky very good sense and somewhere I was wonder how these paragraphas were connected. On the other hand I need to say that author used many foreign sources which was difficult to translate for sure.

I need to mention the length of author's thesis and specially his practical part. The all practical part without tables and graphs has not even 5 pages!!!

The chapters Practical part with other chapter Results and Discussion and Conclusion have 11 pages (tables and graphs included).

I am not sure how author could evaluate the correct data, if his questionnaire was available until 10th of March and he had to submit his thesis on 15th of March.

13 questions in 8 of them? The way should not be : What was your health status and how had Covid-19 impacted your lifestyle overall?

The first thing author should not ask two questions in one. The second author can not do conclusion from one question.

The chapters Results and Discussion and Conclusion have so many mistakes that it makes me wonder if you wrote it in one day by hot needle how we say.

Thesis has definitelly current topic but consider I do know what the goal/s of this thesis was/were, so I am unable to give better grade.

Questions for thesis defence:

1. How did you decide to who you send your questionnaire?

2. What are the goals of the thesis?

3. How long have you been working on your thesis?
