**Other comments or suggestions:**

The bachelor thesis deals with the types of investments, investment strategies and investors' portfolio investments. In the theoretical part the author concentrates on the basic concepts of investments and demonstrates relatively good and comprehensive work, more in-text references would be beneficial.

The practical part is based on the analysis of the performance of investment strategies and the analysis of great investors' success strategy and their comparison.

The main objective was met, conclusions focusing on important recommendations and ramifications were formulated. The thesis could help those who are interested in getting to know more about investing.

I recommend the thesis for the defence with the proposed mark "good".

**Questions for thesis defence:**

1. Compare and evaluate investing strategies of great successful investors mentioned in the practical part (Warren Buffett, John Templeton, Peter Lynch).
2. What investment risk would you be willing to take on while making an investing choice?
3. What investment portfolio is the least risky in your opinion?
