

SUPERVISOR'S OPINION OF BACHELOR THESIS

Study programme: Regional Development
Department: territorial Studies
Author of thesis: Kristýna Cívková
Name of thesis: Overpopulation in India and its global consequences
Supervisor of thesis: Ing. Zbyšek Korecki, Ph.D.

ASSESSMENT OF THESIS: (always add verbal comments)

1. COMPLIANCE WITH REQUIRED ASSIGNMENT:

Submission of the final work content, to the task. Assigned tasks were fulfilled during processing. Relevance of the topic is widely discussed topic especially in the context of the over population and rapid urbanisation process.

The author uses demographic methods to analyze the impact of over population in Mumbai, India, analyzed the stability and life quality in the region. The author was based on theoretical sources dealing with urbanisation process, demographic and urbanisation process. The author investigated the dependence among household food isecurity and access, food expenses, food per day, urban poverty vs. food security in Mumbai and costs of food per day/per person vs. salary.

The science method was used allowed the author to define the strengths and weaknesses of rapid urbanisation and food security in Mumbai.

Meeting the requirements and objectives of this work was achieved.

2. WORK WITH ACADEMIC LITERATURE:

Utilize professional literature points to the fact that the author devoted sufficient attention to the literature search and knowledge gained were the basis for the analysis. The present literature review, an integral part of the thesis and demonstrates the ability of the author to work with the literature and to use the knowledge gained in the process of analysis and design part of the project.

3. CONTENT LEVEL OF WORK:

The content level of work is at an appropriate level. Student especially in the theoretical part of the paper demonstrated the ability of a good compilation of literature.

The author analyzed theoretical approaches to population growth in the use of mathematical tools population growth rate and population growth aiming towards change in population number in time. The analysis conducted enabled the author to adopt adequate proposals in Part 3.

Work is original and inspiring for possible further research in the area of migration and rapid urbanization, and will require in the future similar measurements, especially in territories kd is expected rapid increase in population.

4. FORMAL LAYOUT:

It fills with minor exceptions ISO standards.

5. COOPERATION WITH SUPERVISOR:

The author for the duration of final thesis co-supervisor and responded to comments.

SPECIFIC REMARKS AND COMMENTS ABOUT THE THESIS:

1. In your experience, you can use the integrated child development services scheme and the mid-day meal scheme in other regions and, if so, what steps should be taken by a government or regional representatives.

DEFENSE OF THESIS: recommended

FINAL CLASSIFICATION PROPOSAL: B

Date: 25th May 2016
