❖ Appendix A

➤ Example of Survey Questionnaire for the Doctors

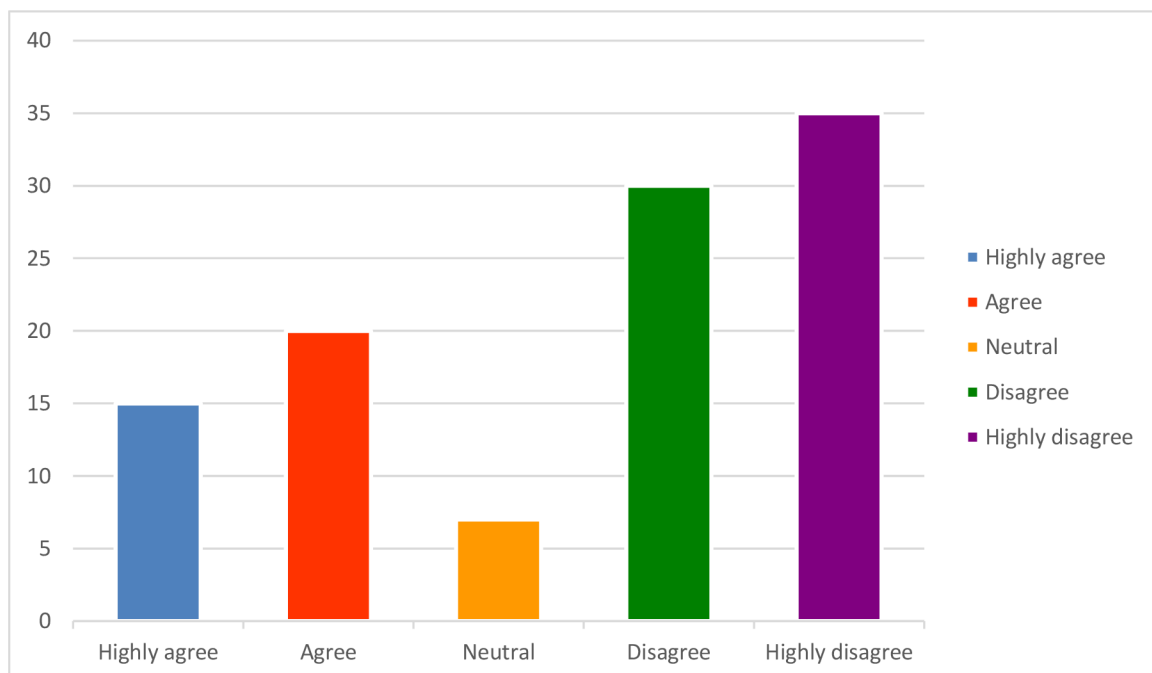

1. Do you face problem working with robots?
 - Strongly Agree
 - Agree
 - Neutral
 - Disagree
 - Strongly Disagree
2. Can Robotic surgeries take over the jobs of doctors?
 - Strongly Agree
 - Agree
 - Neutral
 - Disagree
 - Strongly Disagree
3. Do you feel easier working with smart device in the field of medical?
 - Strongly Agree
 - Agree
 - Neutral
 - Disagree
 - Strongly Disagree
4. Can smart healthcare devices bring about a new change in medical field in the future?
 - Strongly Agree
 - Agree
 - Neutral
 - Disagree
 - Strongly Disagree
5. Do you feel that the robots can be risk of life due to some technical error in the system?
 - Strongly Agree
 - Agree
 - Neutral
 - Disagree
 - Strongly Disagree

➤ Random outcomes of Survey

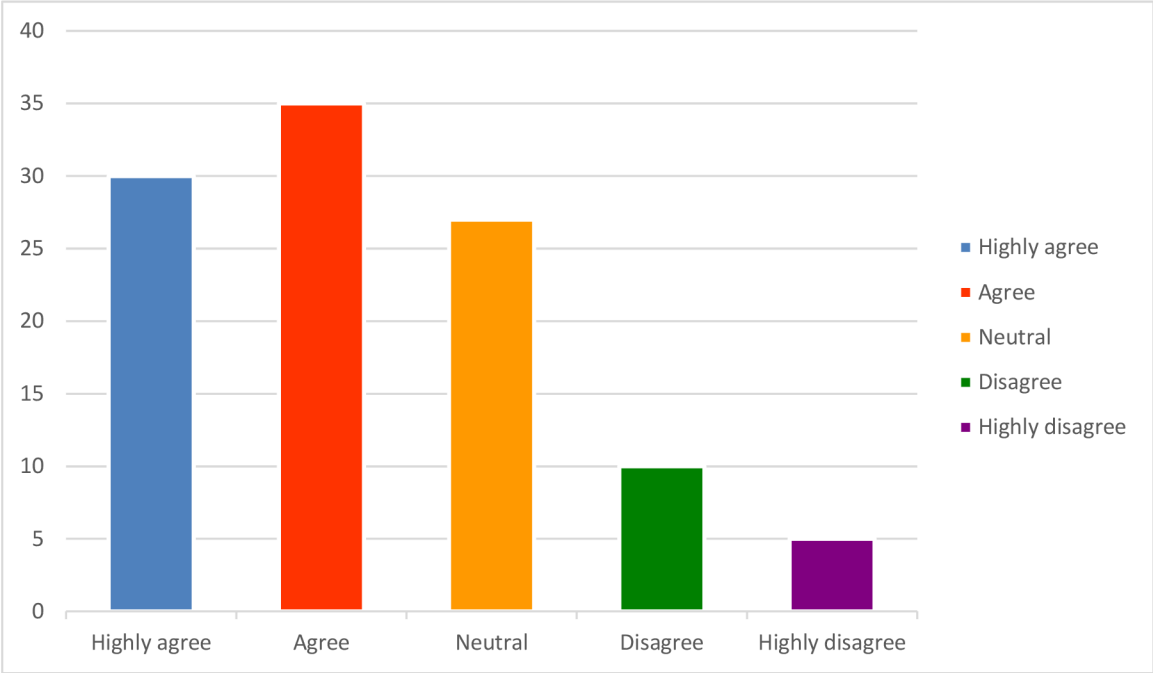

1. Do you face problem working with robots?

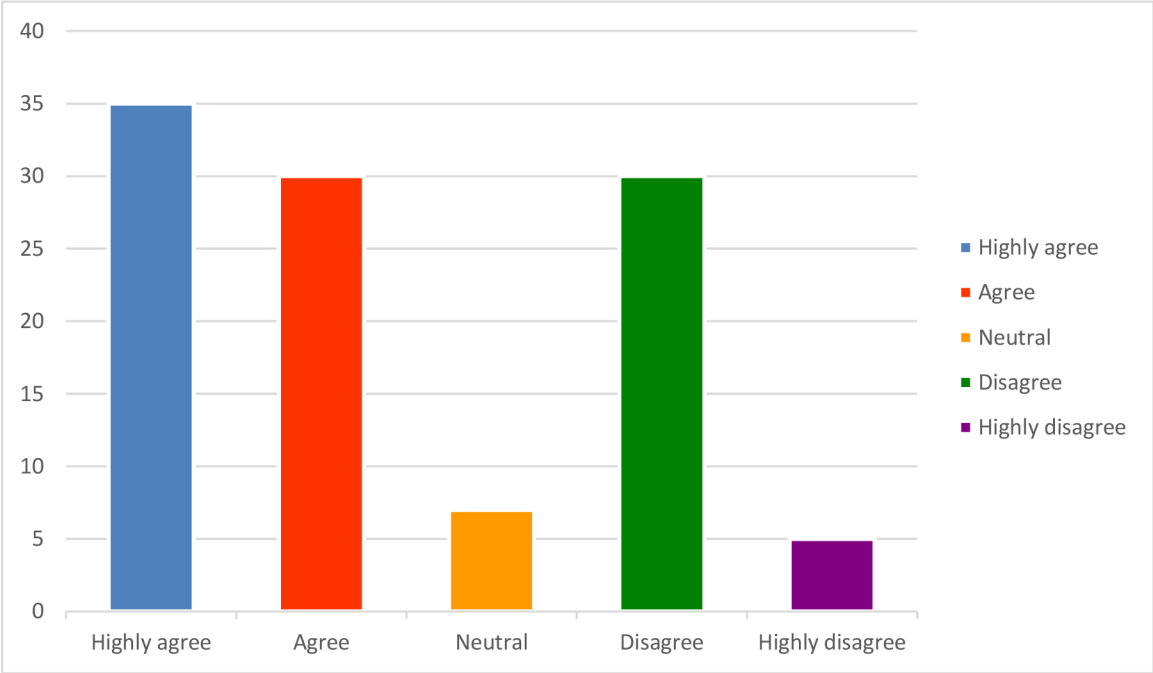

2. Can Robotic surgeries take over the jobs of doctors?

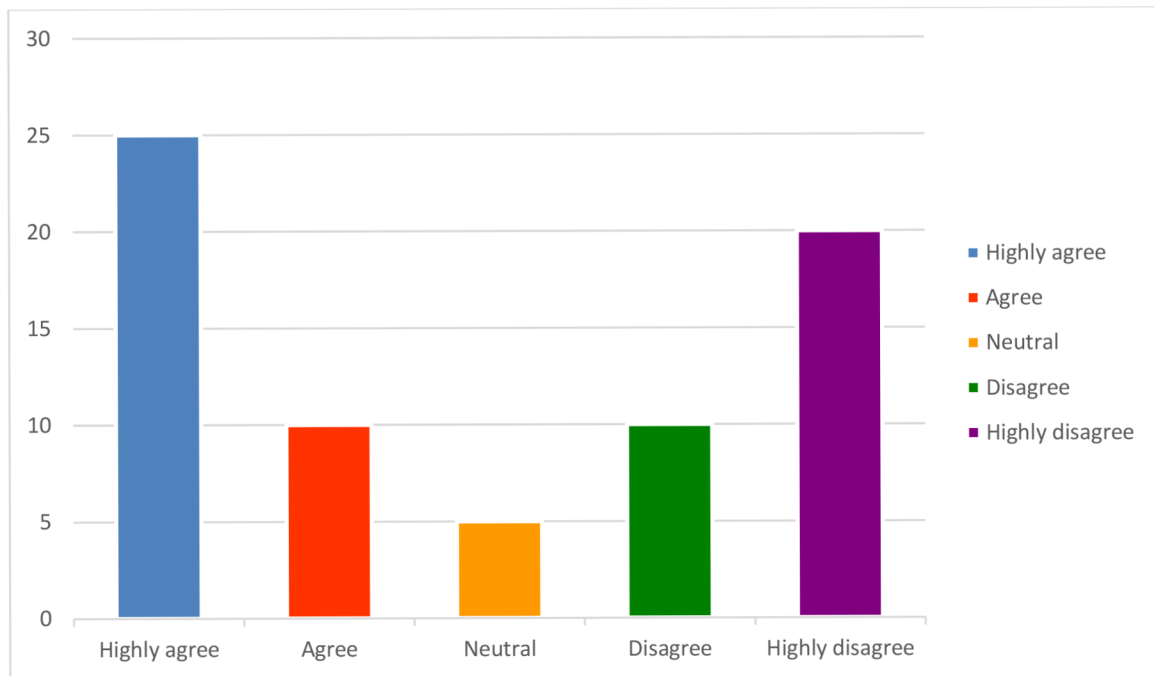

3. Do you feel easier working with smart device in the field of medical?

4. Can smart healthcare devices bring about a new change in medical field in the future?

5. Do you feel that the robots can be risk of life due to some technical error in the system?

❖ **Appendix B**

➤ **Example Survey Questionnaire for the patients**

1. Do you feel positive operated with help of smart healthcare devices?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

2. Do you afraid of robotic surgery?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

3. Do you feel facilitated using smart application such as “telemedicine”?

- Strongly Agree
- Agree

- Neutral
- Disagree
- Strongly Disagree

4. Do you feel the cost of these smart health services are higher?

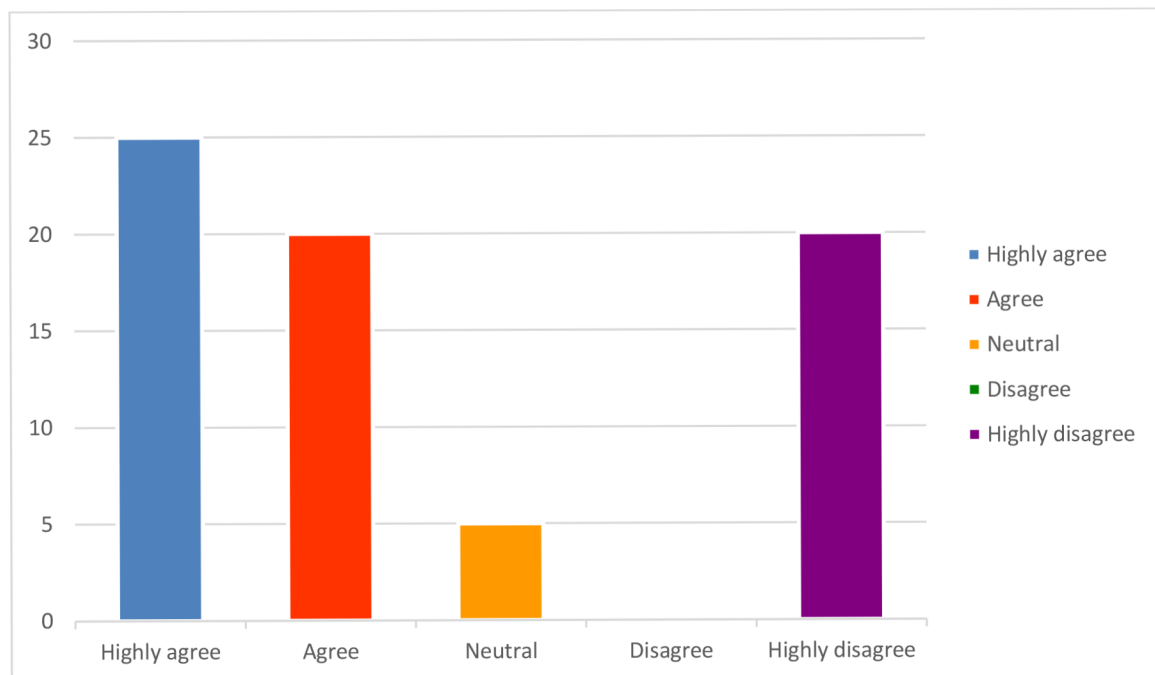

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

5. Can the doctors be lacking their 'skills after the robotics surgeries expansion?

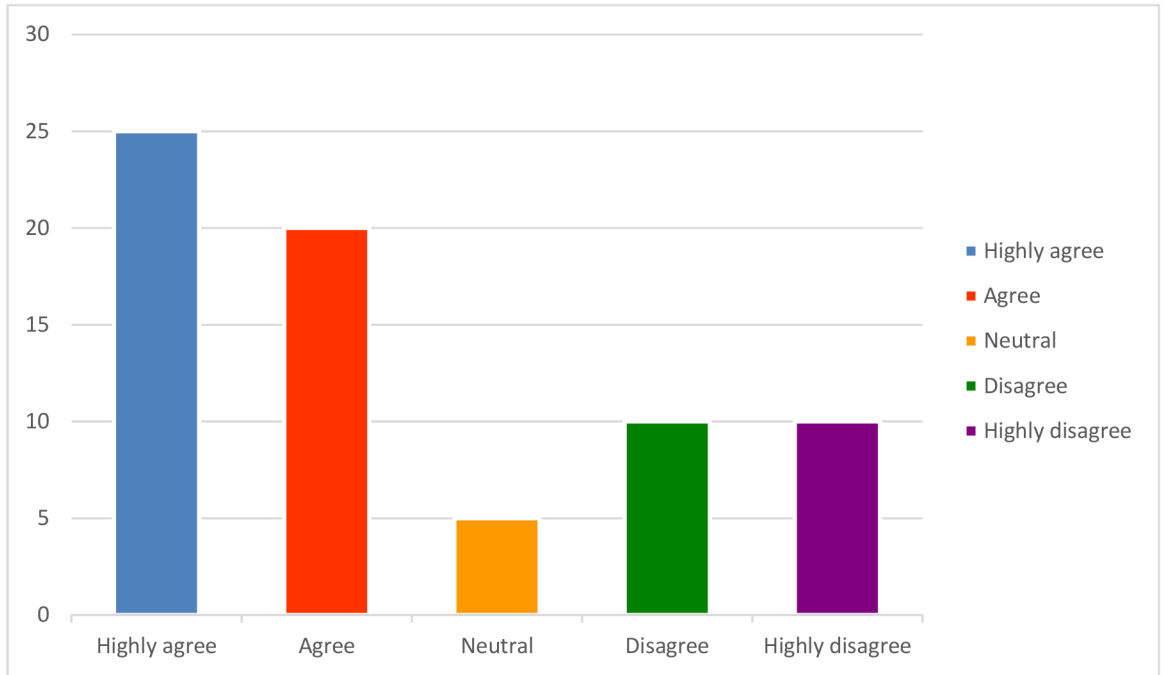

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

➤ Random outcomes of Survey

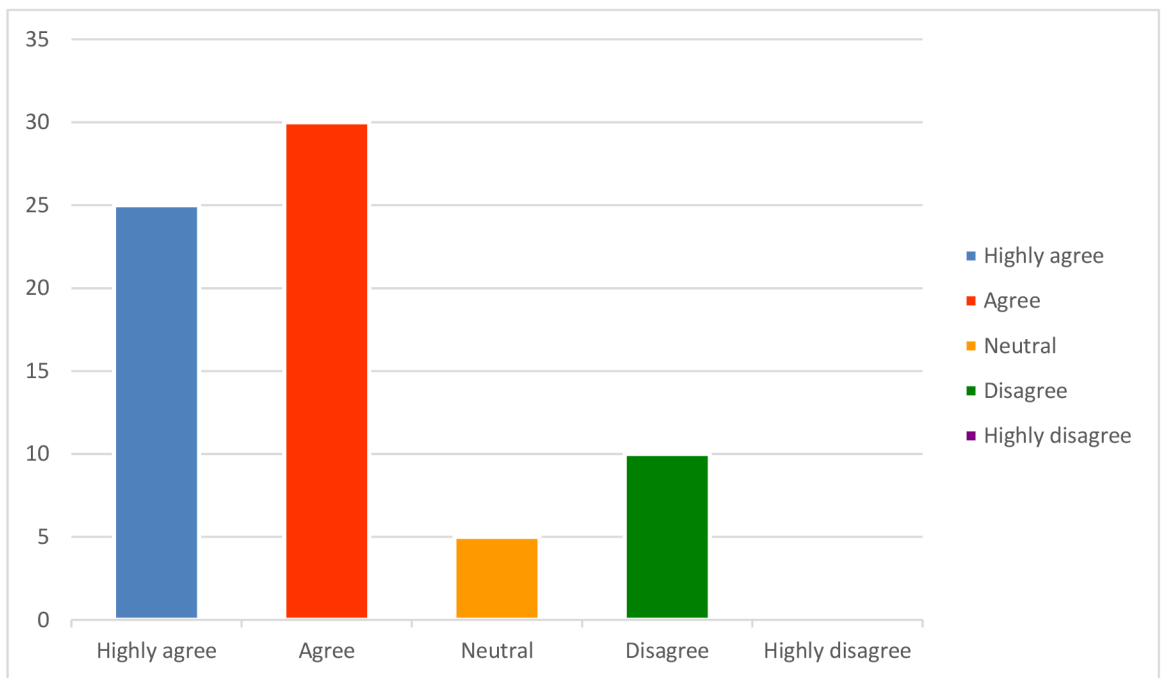

1. Do you feel positive operated with help of smart healthcare devices?

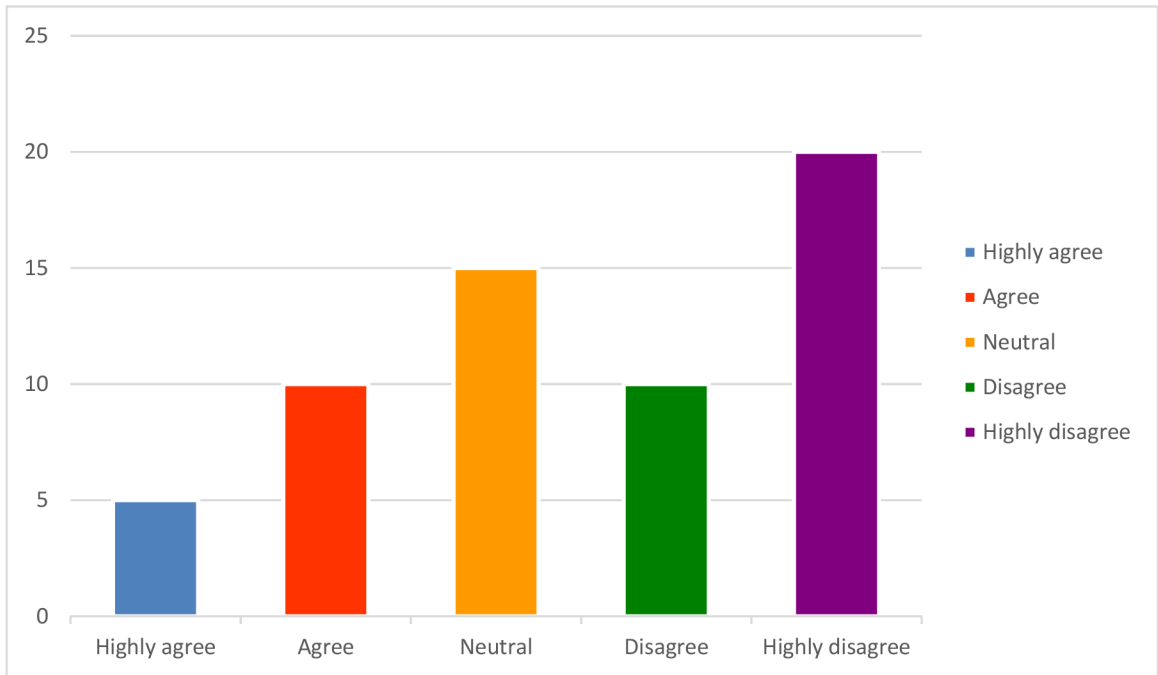

2. Do you afraid of robotic surgery?

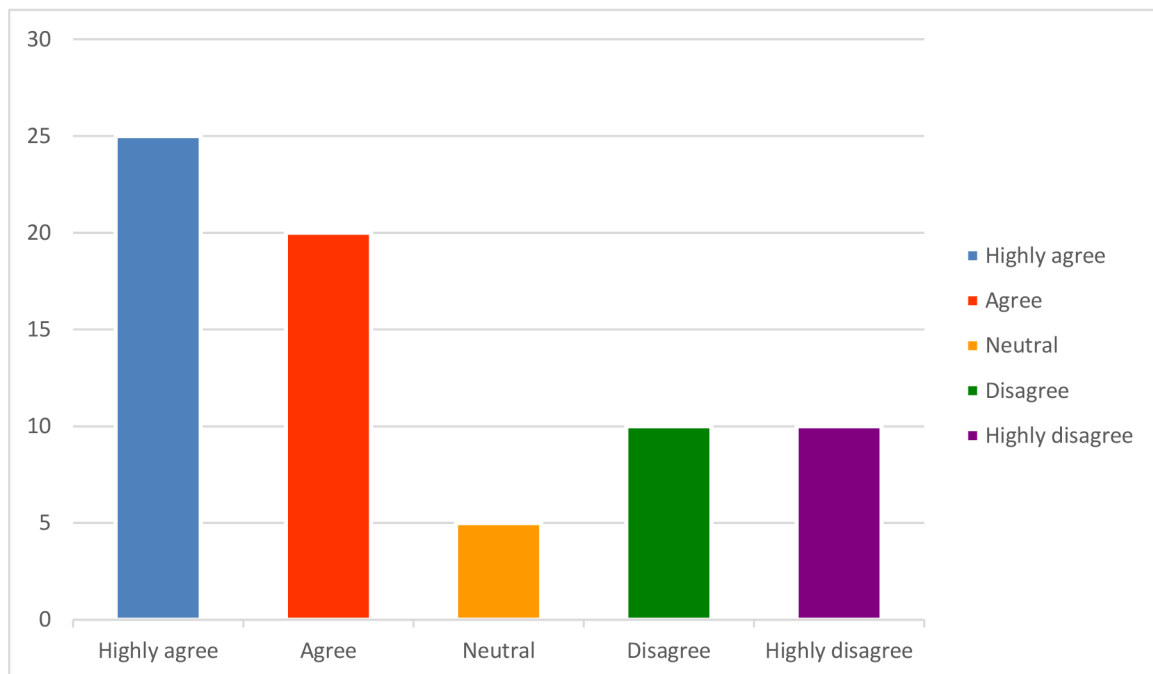

3. Do you feel facilitated using smart application such as “telemedicine”?

4. Do you feel the cost of these smart health services are higher?

5. Can the doctors be lacking their 'skills after the robotics surgeries expansion?

❖ **Summary**

As It can be seen the both ther doctors and patients have their opinion on different aspects of smart healthcare devices, whether it is a machine or a robot. As per the study certain things should be put into consideration before recommending anything. It can be said that smart healthcare is a system that uses several technologies such as mobile internet, wearable devices and IoT so that information gets dynamically accessed and also connects institutions, people and materials relating to the healthcare industry. Smart healthcare responds actively to the environment related to medicine in an intelligent manner.
