## Other comments or suggestions:

The bachelor thesis is focused on the consumption and consumers' behaviour and contains both, the theoretical and the practical part.

However, several weaknesses can found as following.

- The thesis itself uses a different theme than is written in the Thesis Assignent (see the Abstract).

- The extent of the thesis can be considered as border. Even, the Thesis Assignment requires 30 – 40 pages. The thesis hardly reaches the amount of 30 pages.

- The abstract contains the information about the further analysis/explanation of the factors affecting the tea consumption. However, thir part is totally ommited.

- The formulation of the objectives is very weak.

- The practical part is very poor since at least it does not explain the procedure how the detemrinants of coffee consumption were selected. Moreover, in some steps there is not clear link to the selecetd topic and own questionnaire (e.g. Figure 11 and the factor "price").

- The text of the practical part contains just the description of results displayed in the figures and tables. However, the interpretation and deep discussion is totally missing.

I believe that if the author work on the thesis continuously, use the consultations with the supervisor and follow the recommendations, the thesis would be definitely of higher quality.

In conclusion, the thesis cannot be recommended for defense since it does not fulfill the minimal requirement for the bachelor thesis.

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
