Other comments or suggestions:

Unlike the standard format for a thesis, the author has buried the objectives of her research in the first two pages of her "Practical part" (pp21-22), and her methodology follows on the next pages. There is little original contribution here, because the author has simply applied two standard methods ("Simple scoring" and the AHP method), and made a basic comparison.

Other points are:

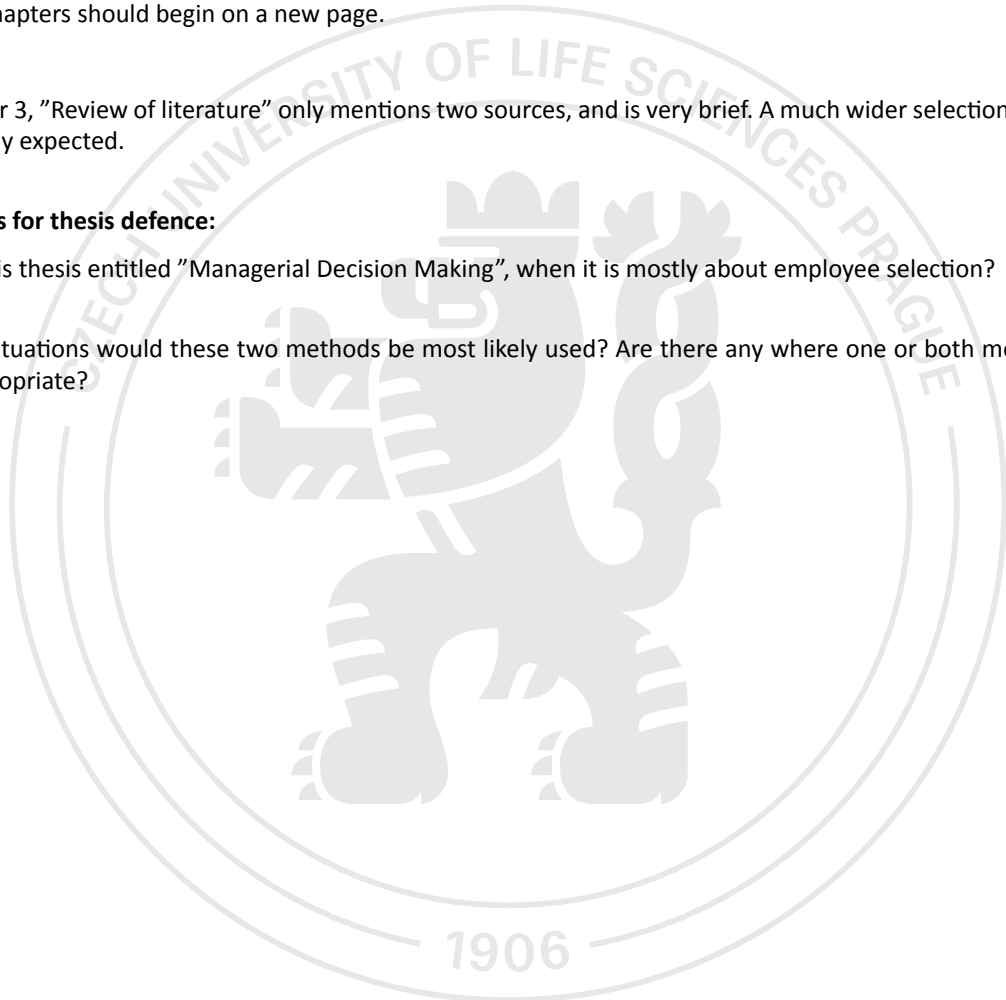

1) New chapters should begin on a new page.

2) Chapter 3, "Review of literature" only mentions two sources, and is very brief. A much wider selection of literature is normally expected.

Questions for thesis defence:

Why is this thesis entitled "Managerial Decision Making", when it is mostly about employee selection?

In what situations would these two methods be most likely used? Are there any where one or both methodologies be inappropriate?
