Other comments or suggestions:

The bachelor thesis deals with decision-making processes and formal procedures that can objectify managerial implementation options.

The work is well structured and divided into prescribed parts. In the introductory part, the author states why managers' decision-making is essential (as a necessary part of every sequential managerial function) and briefly describes the principles of various decision-making methods. In the design part, the author applies the selected method (AHP -Saaty's method) to choose a suitable candidate for the "insurance advisor" position in Generali-Ceska Pojistovna.

The work is written in understandable language and is easy to read. Overall, I rate the bachelor thesis "very good".

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
