**Other comments or suggestions:**

The theoretical part largely lacks citations. At the same time, the sources are incorrectly cited in the references.

The author chose a combination of qualitative and quantitative methods, but in the practical part, most of it is a general description, and unfortunately, I did not see any quantitative methods being used.

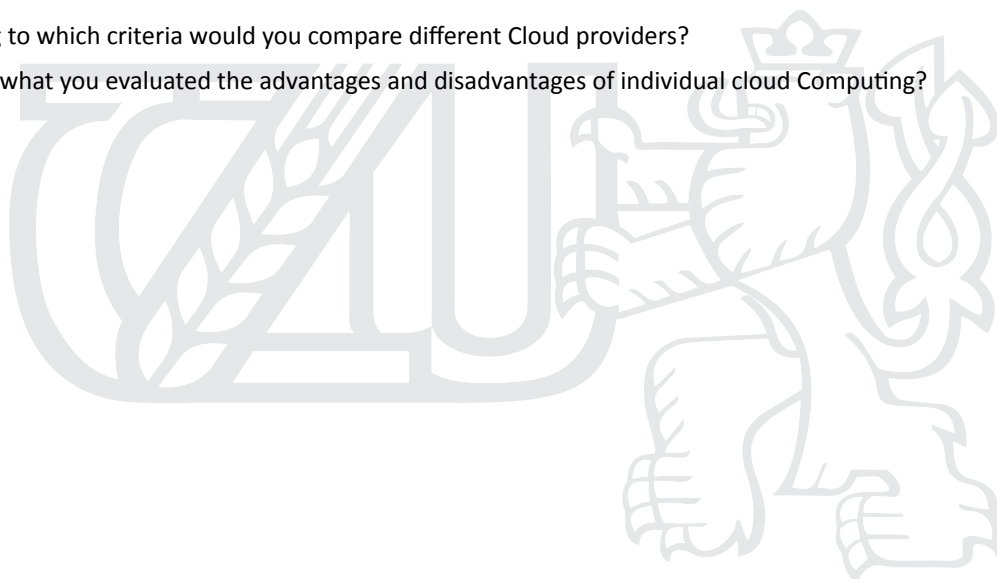

Most of the practical part rather brings the feeling of continuing the theoretical part, and the author's work itself appears on the last five pages.

Therefore, the overall impression from the diploma thesis somewhat lacks the contribution.

**Questions for thesis defence:**

According to which criteria would you compare different Cloud providers?

Based on what you evaluated the advantages and disadvantages of individual cloud Computing?
