Other comments or suggestions:

The submitted diploma thesis deals with Cloud Computing. It is divided into theoretical and practical part. The theoretical part describes the individual Cloud technologies. Unfortunately, the sources in the theoretical part are incorrectly cited, do not correspond to the standard and there are very few citations. The practical part is not author's own work, but apart from a few pages it is a continuation of the theoretical part. Due to the absence of author's own work, I rate the work as good.

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
