

Mendel University in Brno, Faculty of Business and Economics

Dissertation: To which extent are private pensions in life insurances protected in case of bankruptcy?

Author of dissertation: Johannes Fiala, MBA

Supervisor: doc. JUDr. Ing. Radek Jurčík, Ph.D.

### **Expression supervisor to study and dissertation Johannes Fiala, MBA**

Johannes Fiala from the beginning of the study actively participated in all the accusations and teaching hours and study consultations necessary for completion of the doctoral studies at the Faculty of Economics. He also participated in several conferences related to the dissertation topic, for example Firm and competitive environment. During her studies demonstrate diligence appointed and chosen dissertation topic careful attention.

Johannes Fiala dissertation meets all the formal and substantive requirements for this type of work being placed. Has clearly defined targets discussed in the consultation with the contents of the dissertation supervisor and within the internal defense held during the study.

This particular dissertation thesis has a standard structure expected in these types of theses. It is divided into eight chapters with 103 numbered pages. Introductory passages at the beginning of the work in the first chapter are meant to state the topic of the thesis, to give reasons for the particular topic and its necessity in terms of similar research. The second chapter is dedicated to the definition of the objectives and methods of work. The objectives are chosen wisely and coincide with the title of the work in order to encompass the entire assigned topic. The second sub-chapter consists of introducing the methodology, where the author presents procedures selected for achieving the above mentioned objectives. Working methods are selected accordingly and provide a sufficient methodological and analytical apparatus for achieving previously defined objectives.

For this reason, I recommend the dissertation for defense before the committee for the defense of dissertations and after a successful defense of the title Ph.D.
