[\(table of contents\)](#)[V 1.2 - Average Value of Food Production](#)

<a href="#">(home)</a>	
Source	FAOSTAT and ESS calculations
Indicator name	Per capita Value of Food Production
Data Type Representation	I\$ per caput
Definition	The total value of Annual Food Production, as estimated by FAO and It provides a cross country comparable measure of the relative econ
Periods	The indicator is calculated on 3 year averages.
Method of aggregation	Simple aggregation by regions/ subregions then divided by total popu
Estimation of global and regional aggregates	
Contact Person	<a href="mailto:Food-Security-Statistics@FAO.org">Food-Security-Statistics@FAO.org</a>
FAO Indicator ID	V_1.2

It rate in Lesotho increased from an already high 23 percent in 2008 to 29.4 percent in 2009. This is caused by a decrease in the number of people who cross the border to work in South African mines.

Deforestation in Lesotho has destroyed grasses and vegetation, exacerbating erosion. The predictions are that the available water will shrink to 3 percent in the next 25 years from 10 percent today.<sup>118</sup> While other factors contribute to drought, climate change exacerbates the situation.
