**Other comments or suggestions:**

As in the previous version of the thesis, the author didn't work on it consistently, and his working style suffered from procrastination. However, he made some changes in line with feedback remarks: some sources of information were added in the theoretical part, and the discussion in the practical part was enriched by comparison with the results of other studies. Despite the recommendations, the author didn't change the structure of the practical part to reach better clarity and didn't correct the formatting of paragraphs.

Generally, the final evaluation of the thesis is highly dependent on the author's ability to present his work because his previous attempt was unsuccessful primarily because of the defense process.

I evaluate the thesis as "good" and recommend it to the defense.

**Plagiarism control:** The system Theses.cz didn't find similarities in the thesis.
