Partial Comments and Suggestions

The purpose of this study is to examine the problems of social and economic adaptation of youth in Kazakhstan. The first chapter is the introduction which gives general information about the work. The second chapter describes the goals and methodology. The third chapter is the literature review. It explains what unemployment is, the type of unemployment. And how it can affect Kazakhstan as a country in whole. And also briefly describes the following: thus, Kazakhstan and its economy, the structure of education in Kazakhstan is like. The fourth chapter explains the real unemployment situation in Kazakhstan. The fifth chapter is the conclusion which gives a summary of the whole.

The topic of the thesis is interesting and certainly actual. Unfortunately the work doesn't have a well prepared methodology for analysis. It is necessary to make the selection of criteria for assessing the grounds for why the criteria for evaluation and not the other. This methodology should be better described in the thesis. Only after a thorough analysis, it is possible make conclusions.
