Other comments or suggestions:

Author of the diploma thesis had to travel several times to his home country to get the relevant data for his research, which rather prolonged the diploma thesis processing and caused some minor changes in the original content of the diploma thesis. Owing to that, the analysis was completed rather in a less complex form than originally proposed.

Nevertheless, the research has revealed some imoportant findings regarding the position of farmers included in the maize production in the selected Tolon district of Ghana and can thus contribute to the economic and social improvement of the region.

Plagiarism control: The system Theses.cz has assessed the thesis as original.
