

ASSESSMENT OF DIPLOMA THESIS

Author of the thesis: Karolina Katarzyna Pieczonka

Title of the thesis: Molecular characterization of Grapevine Pinot gris virus in Poland

Reviewer of the thesis: dr hab. Barbara Nowak

Study program: International Master Studies of Horticultural Science

Study branch: Horticulture

Academic year: 2016/17

Viewpoints	Evaluation						can not be evaluated
	A	B	C	D	E	F	
1 Fulfilling requirements of the assignment	x						
2 Actuality of processing and professional level of work	x						
3 Use of knowledges obtained by study	x						
4 The use of scientific literature	x						
5 The relevance of the chosen methodology	x						
6 Application level of the chosen methodology	x						
7 The results and the irinterpretation, graphic level, discussions		x					
8 Formal style			x				
9 The author's approach to work	x						

Specific comments and questions on the thesis: The subject of work is related to the latest trends in both viticulture in Poland and the description of new viral pathogens. It has been accomplished using the latest virus detection techniques. The results obtained are contribution to theoretical virology but have also application meaning. Some formal and editorial failures do not undermine the merits of the study.

Result: The thesis is recommend for defense

*Deleteunsuitable

The proposed final classification of the thesis*: A B C D E F
