**Other comments or suggestions:**

The thesis deals with a very interesting and current topic. The thesis is well done in terms of analytical approach. However, the work contains several formal and informal shortcomings. The goal of the work is not clearly defined, the methodology also needs a more detailed description. There is also a problem with graphic throughput, for example Figure 2-1, the own tables should be rewritten. The discussion is not a real discussion comparing the results of other authors, the conclusion is very poor.

**Questions for thesis defence:**

1. What role would play lifting of sanctions?
2. How do you see threat in substitution of non-renewable resources for Iran?
