Other comments or suggestions:

The thesis deals with the relationship between education and poverty.

The overall impression of the thesis is not optimal. The thesis presents interesting findings, but the formal treatment negatively impacts the overall impression of the thesis.

The thesis has an incorrectly inserted thesis assignment, which does not include a watermark. In the literature search, citations are capitalized once and lowercase once. The citations are not according to the standard, with some publications lacking a reference in the text and vice versa. The bibliography is not cited or ordered according to standards.

Compared to the initially submitted thesis, there has been a significant improvement in the methodological and analytical parts of the thesis. The author has also edited the chapters Results and Discussion and Conclusion.

I rate the submitted thesis as "good" and recommend it for defence

Plagiarism control: The system Theses.cz didn't find similarities in the thesis.
