Other comments or suggestions:

Good introduction

Interesting presentation of the background of certification system for Organic Food in Indonesia.

The 4 hypothesis are clearly stated; they are a little bit too general though.

142 respondents is too small for such data analysis method. It would have been interesting to combine with 10 qualitative interviews.

Questions for thesis defence:

1. In the introduction, you mention "This organic agriculture can become one of the solutions to overcome a crisis of foods in Indonesia (Hasnelly & Yusuf 2012)." > Which crisis of foods do you mean ?

2. Do you think your results would be similar in another region of Indonesia ? And with different profile of respondent (non student, rural families...) ?
