Other comments or suggestions:

The graduand has submitted his master thesis oriented to Bio-Energy Carriers in Agriculture in the LDC (Zambia)

I highly appreciate, that the research provided by student was related direct with objective areas of the thesis and provides interesting results with subsequent research study in technical plants as biomass, particularly in the Jatropha and Elephant Grass.

From my point of view I positively evaluate the student's approach during elaboration of the master thesis and active cooperation with supervisor, experts from the Czech Republic and especially cooperation with the experts from Zambia during primary data collection.

I appreciate the student's approach to work, his activity, enthusiasm, purposefully work and his concentrated effort to improve his research outputs by studying relevant professional literature sources.

From the formal point of view, the diploma thesis has the proper structure, required for this category of thesis, starting with the literature review and definition of objectives, continuing in by the methodology chapter and finishing with results, discussion, conclusion and recommendations.

From the above mentioned reasons, I recommend the thesis admitted to defence.

My final statement as thesis supervisor is: Excellent

Plagiarism control: The system Theses.cz has assessed the thesis as original.
