Other comments or suggestions:

The thesis concentrates on unemployment in India, specifically in one Indian state Gujarat. Theoretical part gives some description of unemployment from the world, India and Gujarat point of view, including causes of unemployment and schemes how the Indian government fight with this issue. It is sometimes rather short, but still sufficient. Practical part is based on the questionnaire. It uses appropriate statistical methods, but it should more specify how respondents were chosen, compare obtained results with results of other studies, government statistics and so on. The thesis generally can be defended, I personally suggest total evaluation "good".

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
