Other comments or suggestions:

The Bachelor's thesis deals with the financial analysis of a selected company. The thesis has a standard recommended structure composed of both theoretical and practical parts. Unfortunately, the practical part does not correspond fully with the theoretical one, and the thesis as a whole gives the impression that it is unfinished. The author provided vertical and horizontal analysis, but just liquidity ratios are used from the core financial ratios. Essential ratios of profitability, stability, etc. (mentioned in the theoretical part) are not used, which does not enable to provide full-fledged analysis and draw adequate conclusions. The thesis is, therefore, far from being complex. Nevertheless, the author has proven the mastery of basic principles in elaborating scientific work.

Plagiarism control: The system Theses.cz has not assessed the thesis as suspicious.
