Other comments or suggestions:

Unusual topic, very descriptive with little analysis. A thesis submitted already 2 years ago. Thesis has very ambitious goals and research questions, yet little is done to achieve these goals and these research questions by certain methodological tools. Yet, the thesis provides a complex overview of New Caledonia and its zinc production. I propose the thesis for defense with the results "good".

Plagiarism control: The system Theses.cz has assessed the thesis as suspicious. After a manual check the file was not assessed as plagiarism.
